ABOUT

Full stack web developer with a passion for collaborative problem-solving. With experience in Ruby on Rails and JavaScript, and a background in consulting and customer on-boarding, I bring an understanding of the interplay between the technical and operational needs of a company. Strong skills in project management combined and group dynamics, I help companies achieve high-quality outcomes in a time efficient manner.

TECHNICAL PROJECTS

BookTracker - Github | Demo
An app that tracks personal book library

- Utilized Ruby on Rails as an API backend, enabling controllers to respond to requests with JSON.
- Implemented JQuery and JavaScript on the frontend to consume data from the API endpoints.
- Integrated OAuth and Devise for authentication.

PlantPower Github | Demo
An app that enables used to find Plant Based Recipes

- Build a Ruby gem that provided a CLI interface
- Scraped McDougall recipe site with Nokogiri

Spanish Squares Github | Demo
Variation on Bingo to teach kids Spanish in a addictively fun way!

- Created a Rails API with a PostgreSQL database
- Utilized React frontend with a Redux store with ES6
- Chose CSS Grid for page layout

EXPERIENCE

PROMPT
